Classic

Packing can be so easy

Easy to operate

The SpeedMan Classic is a practical and effective device to fill and pad shipping cartons. Simply pulling from the inside of a paper roll produces high-volume packaging material. Operation is simple: Just pull out the desired paper quantity, tear it off, stuff the carton and you're done. It's child's play, the SpeedMan Classic works everywhere.

Taking environmental protection seriously

SpeedMan® protects the environment: This is because the machine is filled exclusively with 100% recycling paper. In addition, the SpeedMan Classic works without power and thereby consumes no energy. It's gentle on the wallet and the environment.

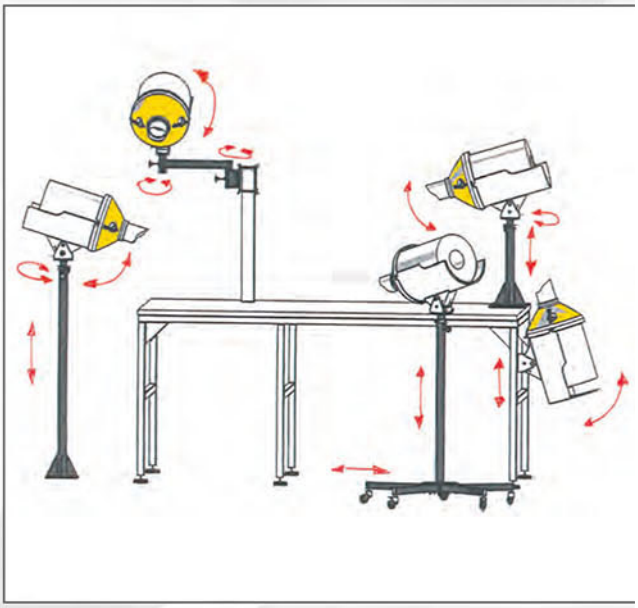
Flexible fastening

Healthy work

SpeedMans versatility means it easily fits into any size work space. The SpeedMan® adjustable stands have been designed ergonomically to ensure safe and healthy working positions.
" Efficiency, designed to effective gain not pain"



At a glance

SpeedMan® - filled fast

The SpeedMan Classic is a flexible paper filling system for professional needs. Operation is easy and self-explanatory. You simply pull the paper from a funnel and SpeedMan® automatically maximizes volume. This means that your products get to their destination more quickly and in an environmentally friendly way.

SpeedMan® - pack quickly and cleanly

Ready fast

The SpeedMan® is integrated directly into your workplace. The packaging material is available on demand to enable you to fill cartons directly, saving you time and effort.

Saving storage space

The SpeedMan paper only takes space where it is necessary and that's in your packaging. SpeedMan® can create 70 times the initial volume of a roll of paper. This means less storage space, maximum volume.

One for all

SpeedMan® packs it all for you: large, small, heavy, light, thin, thick and breakable objects. The possibilities of packing with paper are unlimited, pack & protect sharp and pointy objects with SpeedMan® quickly, easily and securely.
