

Tape Dispensers

○ **EUROTAPER**
EA2 100/220 semi-automatic

○ **VARIOTAPER**
EL 5 Electronic 1500 fully automatic

○ **TAPEMASTER**
Fully automatic

The Advantages of our Tape Dispensers

- Economy
- Labour-saving and fast amortisation
- Rational operation
- Improved productivity through time saving
- Suitable for paper qualities from 40 g/m² up to fibre-reinforced qualities
- High price-performance ratio
- Low price – long life
- Winding options for the tape with the gumming inwards or outwards
- No noise in standby mode
- Easy handling and easy operation
- Service-friendly
- Upgrading possibilities

EUROTAPER

EA2 100/220 semi-automatic

The **simplest** method to work with adhesive tapes

The tape length is continuously adjustable between 100 mm and 1000 mm, on request also unlimited.

VARIOTAPER

EL 5 Electronic 1500 fully automatic

The **most rational** method to work with adhesive tapes

At the touch of a button the required length of tape is dispensed immediately. It is evenly moistened with pre-heated water, electronically cut to the exact length and can be used immediately. The tape length is continuously adjustable between 100 mm and 1500 mm. The tape is dispensed in user-defined lengths – according to the length of time the button is pushed – or also in 2 pre-selected lengths (length A and length B). Optionally the integrated opto-electronic repeater mechanism dispenses the required length of tape. In addition the tape length A, A – B or A – B – B is selectable. The dispensing cycle can be adjusted to the working cycle between 0 and 24 seconds.

TAPEMASTER

fully automatic

The **most effective** method to work with adhesive tapes

14 buttons with pre-set lengths and an additional +5 button ensure the required length of tape is electronically cut to the exact length, moistened and can be worked with immediately. The tape lengths are available in 100 mm steps from 100 mm to 1400 mm and can be extended by 50 mm with the +5 button. This tape dispensing is carried out in the lengths keyed in by you.
